

PCE MYPRO REMOTE MAINTENANCE TERMINAL

These are complete, used, self contained, remote PCE Mypro maintenance terminals from Brooks Automation (formerly Semy) used on VTR 7000 vertical furnaces. Included are the touch screen, floppy drive, numeric key board, and full interface cables.

The remote terminal can be used to take direct control of a furnace from the rear while performing repairs or preventive maintenance. It is a great tool for technicians to use during troubleshooting.
